

Senior Data Scientist Take-Home

Welcome — and thanks for taking the time on this. Please read the **Take-Home Case Study** first, then the **Data Dictionary**. The remaining items (silver schemas, gold NULL-rate stats, view SQL) are reference materials you'll draw on for Parts 1 and 3. The CSV is attached at the bottom.

If anything in the materials is unclear or contradictory, please flag it — that's useful signal for us, not a problem.
